Pune – 411 004

Dear Sir:

This is to place on record our sincere appreciation of your product and your team's efforts in implementing the ERP product in our group of companies.

We are happy to note the systematic way, in which your team analyzed our internal processes and mapped each process onto the ERP package. We had decided to implement the ERP with the single intention of making all processes a part of the ERP. It seemed a very daunting task at first but after the CRP it was clear that there was little that was not covered by your package.

We have been able to implement your ERP system in a record time in all our companies even though we do not have very highly qualified staff members. The user friendliness of the system was easy to implement and gave us all the results that we wanted. Today, we are using all MIS information for all departments from the system. It is truly online and integrated system and takes care of all our statutory requirements which are so complex and ever changing.

We are currently using most of your modules including the fixed assets module, workflow module, TDS, Excise, quality control, right upto getting P&L & Balance sheet. We are very happy with the resulting savings in time and the level of accuracy that the package helps us achieve.

We wish you the best and would definitely recommend this package to all companies looking for a ERP solution.

Thanking You,

Yours truly,
For Elemec Industries,

Rosy Bhatevara,
Managing Director,
